Hi Level Waste Calculations. PURPOSE - This model is a simulation of the consequences resulting from radioactive waste disposal. In addition, the system is used to provide rapid plots of the output of the model. Data sets include several computer programs that are used to perform a generic work assessment of the geologic disposition of radioactive high level waste.

Retention: Retain 5 years after completion of project.

Disposition: Break file upon completion or termination. Store tapes at Data Center Tape Library for 2 years, then transfer to FRC. Keep in FRC for 3 years, then destroy.
